KEY ACHIEVEMENTS

Enhanced Application Performance

Increased application speed by 30% through optimization.

Improved Code Quality

Reduced bugs by 25% through effective code reviews.

UI Development Success

Developed 10 user interfaces gaining user satisfaction.

Team Collaboration Effectiveness

Boosted team efficiency by 15% collaborating cross-functional teams.

SKILLS

HTML5 · CSS3 · SCSS · Javascript · ReactJS ·
Angular · NextJS · Vue · Responsive Web Design ·
SharePoint · Power automate · TailwindCSS ·
Ant Design · Material UI · Fluent UI · Bootstrap ·
Element UI · Playwright · Jest

SUMMARY

Results-oriented Frontend Developer with 6 years of experience architecting and maintaining scalable web applications. Proficient in React.js, Next.js, Vue.js, and Angular, with a proven track record of delivering high-performance, user-centric interfaces. A collaborative problem-solver dedicated to code quality, performance optimization, and staying at the forefront of modern web technologies.

EXPERIENCE

Alphaway Technology

Location

Frontend Developer

07/2024 - Present

- Engineered core modules for the **IDO Web App** using **Angular** and **Backbase**, empowering branch tellers to provide seamless, high-efficiency customer service.
- Developed critical features for the **Payment Agent Web App** with **Vue.js**, streamlining the management of agency branches and partners while optimizing operational throughput.
- Architected intuitive dashboards and analytical reports for the **CRM Web App**, enabling Relationship Managers to derive data-driven customer insights and significantly streamline task management workflows
- Developed the frontend for the AI Frontline project using Angular, Tailwind CSS, and WebSockets, featuring a dual-panel layout—a real-time interactive chat interface paired with an intuitive data dashboard—to enable PRMs to efficiently query and visualize customer information.

BMBSOFT

Location

Frontend Developer

08/2022 - 07/2024

- Developed a high-performance, intuitive web application for SeaBank tellers, streamlining transaction processing and reducing operational downtime.
- Engineered responsive, user-centric interfaces using **Angular** and **Angular Material**, streamlining teller workflows and optimizing real-time interaction with core banking systems.
- Spearheaded the development and configuration of end-to-end CMS solutions using **SharePoint**, **Angular**, and **React.js** for high-profile clients, including **Nestlé**, **Ofekpoint**, and **BuildCorp**, delivering tailored digital experiences that met complex business requirements.
- As a Frontend Developer, I engineered tailored solutions to address unique business challenges, delivering high-impact features, improving codebase maintainability through refactoring, and ensuring long-term system stability.
- Collaborated with cross-functional teams to deliver high-performance CMS solutions, bridging the gap between technical implementation and business needs to optimize client operations.

Toprate

Location

Frontend Developer

06/2021 - 08/2022

- Worked on multiple banking projects utilizing React.js, Angular, and Material-UI to develop robust and user-friendly applications
- Designed and implemented user interfaces for banking applications
- Optimized application performance to enhance user experience
- Ensured cross-browser compatibility and responsiveness
- Collaborated with backend developers to integrate APIs
- Conducted code reviews and implemented best practices to maintain high-quality standards

HEYO Trip

10/2020 - 06/2021

Frontend Developer

- Used Next.js, HTML5, CSS to build a website for booking flight tickets, hotels, and taxis
- Implemented responsive design strategies to provide a seamless user experience on mobile phones, tablets, and desktop computers
- Conducted research to identify and implement solutions tailored to the exceptional business needs of the website

Hivetech

05/2020 - 10/2020

Frontend Developer

- Collaborated with a 6-person team to build an HR web application using React.js and Ant Design.
- Optimized the application for speed and scalability to support a smoother user experience.
